DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Applicant's amendment of claim 17 overcomes the previous rejection due to the inclusion of the limitation of the "flexible connecting flaps . . . being of a material different than a material of said two side parts". The closest prior art for teaching this limitation is Makoski (U.S. Patent No. 4,824,168) which teaches straps (49) being of a material different than a material of the side parts (shown in FIG 3). However, examiner believes that the straps of Makowski could not be reasonably defined as "flaps" and would not suggest manufacturing flaps of a different material than the side parts.

Applicant's amendment of claim 21 overcomes the previous rejection due to the inclusion of the limitation of the elastic members being "embedded in two side parts, respectively, near a boundary between said body part and said seat part". Examiner notes that the applicant's specification clearly defines the "boundary" as item 16a. It would not be reasonable to argue that the elastic members of Tam et al (U.S. Patent No. 5,662,380) are "near" the boundary as clearly defined by the applicant, as the elastic members (208, 216) of Tam are located at points far away from the boundary (approx. at item 156 of Tam).

The record makes clear the reasons for allowance of independent claims 26 and 34.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
